PROFESSIONAL SUMMARY

Detail-oriented B.Tech Computer Science & Engineering student (4th year) with hands-on experience in full-stack web development. Proficient in Java, React.js, Node.js, Express.js, MongoDB, and PostgreSQL. Strong foundation in Data Structures & Algorithms and OOP. Passionate about building efficient, user-friendly web applications and solving real-world problems. Seeking a job opportunity to apply my technical skills and contribute to industry projects.

TECHNICAL SKILLS

Programming Languages: Java

Frontend Development: HTML, CSS, TailwindCSS, JavaScript, React.js

Backend Development: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP)

Tools & Technologies: Git, GitHub, VS Code

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering

Meerut Institute of Engineering and Technology, Meerut — Currently in 4th Year

INTERNSHIP EXPERIENCE

MERN Stack Development Intern — Anudip Foundation

- Worked with both frontend and backend modules of full-stack web applications using the MERN stack
- Developed and integrated RESTful APIs to connect backend services with the React front-end
- Gained hands-on experience working on real-world projects under mentor guidance

Web Development Intern — Thiranex

- 1-month project-based internship focused on web development

PROJECTS

TaskFlow

A full-stack project management system application that helps users organize projects, manage tasks, and collaborate efficiently through an interactive Kanban board.

MechMate — Automobile Service Management System

Designed and developed a full-stack automobile service management platform using the MERN stack, enabling customers to book and track vehicle servicing, and integrating an AI-powered chatbot to handle customer queries and service assistance.

Job Portal (MERN Stack)

Built a full-stack job portal connecting job seekers and employers, with features including job listing and search, candidate profiles and resume upload, employer job postings, and application tracking. Developed using MongoDB, Express.js, React.js, and Node.js.

Labour Management System

Built a full-stack platform to support daily-wage labourers by connecting them with employers, featuring worker profiles, job/work listings, and tools to help manage and track labour assignments. Developed using the MERN stack.

CERTIFICATIONS & ACHIEVEMENTS

- TCS iON Career Edge - Young Professional — Completion Certificate
- AWS Prompt Engineering — Completion Certificate
- JavaScript Course Completion Certificate
